SPRINT 1 PLANNING FLOW

Decisions for Sprint-1 Planning:

- We have decided to create a Sprint Backlog in excel sheet.
  Link:
  https://docs.google.com/spreadsheets/d/1Lr_VYmqi5n5oMtYRuCff4cOrRQLr4y
  zAykQSG2pVCxY/edit#gid=0
- Decided a time for SCRUM meeting at 10PM every day.
- The git commit message format will be <Action> by <name>
- Decided to create branch for every member in the format rent_memberName.

Sprint 1 Backlog and General Actions:

1. **Review Product Adding Request**

- **Task:** View & select request for review, send email to user (Renter), maintain log of approved & disapproved requests, conduct unit testing, follow coding standards and add documentation.
- **Assigned to:** Iffat Ara Sanzida (IA)
- **Deadline:** Feb 16, 2024

2. **Book a delivery man**

- **Task:** Book a delivery man providing user information, track delivery status, conduct unit testing, follow coding standards and add documentation.
- **Assigned to:** Fariha Rahman Saba (FR)
- **Deadline:** Feb 16, 2024

3. **Payment**

- **Task:** show payment successful message for a valid order, show options for different payment methods, monthly payment implementation, advance payment implementation, EMI subscription implementation, conduct unit testing, follow coding standards and add documentation.
- **Assigned to:** Jannatul Ferdoush Jannati (JF)
- **Deadline:** Feb 16, 2024

4. Search Items

- **Task:** Ensure there's a search bar prominently displayed on the platform's interface, implement filtering options to refine search results based on criteria such as category, ensure keyword-based search functionality, conduct unit testing, follow coding standards and add documentation.
- **Assigned to:** Sumaita Binte Shorif (SB)
- **Deadline:** Feb 16, 2024

5. Add an item

- **Task:** User selects "Add Item" from the menu, user with a form for item details (name,description), user enters item details and submits, validates and confirms the successful addtion of the item, conduct unit testing, follow coding standards and add documentation.
- **Assigned to:** Amena Akter Sathi (AA)
- **Deadline:** Feb 16, 2024

Definition of Done (DoD):

- Followed coding standards and guidelines.
- Unit tests are implemented and passed successfully.
- Code is reviewed by team members.
- Code is pushed into respective branches on GitHub.
- Functionality is demonstrated and meets acceptance criteria.

Sprint Review/Retrospective:

The retrospective meeting is scheduled for February 16th to review the sprint's performance, including successes, areas for improvement, and potential adjustments for the upcoming sprint, in collaboration with the supervisor.

We will ensure regular communication among team members through daily scrum meetings and discussions on Discord. This ensures seamless progress and fosters collaboration throughout the sprint duration.
